

# Continuous Wash Systems

Designed to wash all kinds of containers, pallets, bins, covers and baskets in the meat, fruits and vegetables, baking, and other food processing industries.

- Stainless steel materials
- Closed water circulation
- Continuous washing system
- Power supply: electric, steam and electric-steam
- Smooth action conveyor with advanced regulation
- Effective water filtration system
- Detergent concentration and dosage system
- Clean container slide
- Connection of additional wash/dry equipment available

MP-300

## MP-300 Container Washer

- Tunnel construction for optimal washing
- High efficiency – up to 300 containers per hour

MW-600

## MPU-600 Universal Container Washer

A modular tunnel design achieves maximum washing and disinfecting. The MPU-600 can run up to 600 containers an hour.

- High efficiency – about 600 containers per hour
- Regulation and distribution of rinsing water in range: intensity of rinsing, refreshing of containers, overflow
- High-pressure nozzles with a changeable outflow angle
